

RFS2: Low Phase Noise Rubidium Oscillator

Description

The RFS2 is a high quality rubidium oscillator module. Intended for OEM applications, the RFS2 provides a very accurate 10 MHz output signal.

A special feature of the RFS2 is its small size and low power consumption. Its size is 2 x 2 x 1 inches or 51 x 51 x 25 mm and operates from 12V with a typical power consumption of 6 watts.

Many options are available for the RFS2.
